

**The Neurosequential Model of Therapeutics®
NMT Training Certification Phase I
2021 Virtual Bootcamp**

[NMT Training Certification: Brief Overview](#)

The Neurosequential Model of Therapeutics (NMT) is a neurodevelopmentally informed, biologically respectful approach to the clinical problem-solving process. NMT Training Certification provides systematic, manualized and multidimensional learning activities intended to provide the clinician with the necessary background and supports to use this approach. This training involves capacity building related to the core concepts underlying the NMT and to the clinical application of the Neurosequential Model. The primary focus of Phase I training is to build comfort with, and experience in, organizing clinical information in a neurodevelopmentally-informed way, and to develop competence with the web-based NMT Clinical Practice Tools (the NMT Metrics). Participants are provided multiple opportunities to see multidisciplinary clinical problem solving using the NMT approach.

The majority of NMT Training Certification is self-paced using web-archived materials that allow participants to work through the content in a flexible manner, allowing busy clinicians to participate without disrupting their usual clinical and professional activities. Monthly live webinars do provide opportunities for direct interactions with a learning cohort (Study Group) and NMT faculty (NMT Trainers and Mentors).

The format, while highly structured and manualized, is flexible and convenient. While this flexibility is truly welcomed, many professionals appreciate more intensive interactive opportunities to connect with their fellow NMT learners and practitioners. NMT Bootcamp provides this face-to-face (or live virtual) learning experience.

[NMT Training Certification – Phase I Bootcamp: Virtual 2021](#)

The Neurosequential Network is pleased to offer a Bootcamp for our NMT Training Certification - Phase I Program on **Wednesday, April 28, and Thursday, April 29, 2021**. This Bootcamp will be a **live, virtual-learning experience** led by NMT Mentors and Trainers in collaboration with The Village Network (OH).

Please note that participants must plan to attend for the full two-days online and must have access to a computer and high-speed internet connection to participate.

NMT Training Certification – Phase I Curriculum:

The Neurosequential Network's NMT Training Certification Program combines live and self-directed learning opportunities in Phase I. Phase I Training is organized into 12 “modules” (10 training modules and 2 reflection modules), and a provided training guide articulates all required activities for each module. Participants typically spend one year systematically working through the content. Required curricular elements are outlined briefly below:

1. Multimedia Content:

Video content, recorded presentations, YouTube Channel content, etc.

2. Readings

Syllabus of 21+ professional articles and chapters as well as guided reading of Dr. Perry's book *The Boy Who Was Raised as a Dog*.

3. NMT Core Certification Series Recordings

20+ hours of Introductory and Core NMT Case-based teaching conferences

4. Case-based Seminars: Recordings of one NMT Case-based Training Series

Recordings of one complete NMT Case-based Training Series (15 hours)

5. Learning Community Discussions and Study Group Participation

Participation in monthly, 1-hour Study Group call led by NMT Trainers and Mentors

6. NMT Online Clinical Practice Tools (aka the NMT Metrics or Brain Maps)

Access to and ample practice with NMT Online Clinical Practice Tools to allow each participant to become familiar with the NMT metrics. Also, participation in Metric Tool Scoring calls and participation in bi-annual Fidelity Exercises.

The NMT Phase I Bootcamp is a terrific way for participants to jump-start their Certification process and provides clinicians with opportunities for supported learning and relationship-building. Following Bootcamp, participants will continue Phase I training and be assigned to a Study Group that will meet virtually once per month to review and discuss each module.

Once Phase I Training is completed, clinicians join a worldwide network of NMT Trained providers who share best practices on an ongoing basis and may elect to move on to Phase II/Train-the-Trainer (TTT) directly or enroll in the Maintenance Phase.
